Lane Business Park,
Monahan Road,
Cork City

DESCRIPTION

Vision Contracting Ltd completed the construction of a unique contemporary residence on the cliff edge. The project was executed on a Design & Build basis. The work scope included the demolition of an existing dwelling to be replaced with a very sophisticated contemporary home with raised curved ceilings, flexible & open floor space, minimalist decorative elements, and extensive use of modern materials throughout. External elements included substantive finished concrete, glazed panels, zinc cladding and natural stone.

KEY FEATURES

- Access & egress to the works area was challenging in that all materials had to be crane lifted.
- Helical pile technology employed for foundation support.
- Timber frame construction for construction programme benefits
- Extensive Glazed & Zinc cladding elements.
