DESCRIPTION

This project involved an extension to the existing car park. Vison Contracting Ltd were appointed Main Contractor and PSCS. The civil and building works consisted of constructing 100 no. new car parking spaces which tied in to the existing car park at the north-west corner. Existing car park services including storm water drainage, public lighting and CCTV had to be extended in to the new parking areas.

KEY FEATURES

- A comprehensive permit to work system was operated jointly by the PSCS & Client.
- Noise & Dust control was crucial to this project during construction.
- CCTV & Barrier control linkage to the main controller system.
