DESCRIPTION

Vision Contracting Ltd were appointed Main Contractor and PSCS to carry out car park and access road improvement works. The works included the demolition of existing car park structures, the construction of new boundary wall, public footpaths, new car parking spaces and the realignment of the car park entrance and all associated traffic management to ensure minimal disruption to the normal operation of the shopping centre. New traffic islands, pedestrian crossings, signage, drainage and car park markings also formed part of the work scope.

KEY FEATURES

- Works were carried out on a 24 hour working basis over a 3 week period
- Extensive traffic management and out of hours working was employed to minimise impacts on customers and to ensure the normal operation of the SuperValu centre
