DESCRIPTION

This project, which was built by the Vision Senior Management Team, included the demolition of part of the southern elevation, construction of three swimming pools and a five storey extension which required extensive secant piling to incorporate the extension and the new spa. Also included was the removal of the rear wall to the auditorium and new supports to the existing roof.

A new external terrace was completed to the front of the Function room. Internally, the existing auditorium was redeveloped. Finishes included marble flooring.

KEY FEATURES

- Large structural element to Leisure frame.
- Significant dewatering with secant piled wall construction
- Significant co-ordination with structures & fit-out.
