Axiseng,
47 Mount Street Upper,
St. Peters Street,
Dublin 2

Description

Vision Contracting were appointed as the Main Contractor and PSCS by MHL Hotel Collection and Virtus Project Management to complete the reconfiguration and fitout of the Powerscourt new Sally Gap Bar. The reconfiguration is replacing the traditional style of the McGill's pub previously on the premises.

The new Bar & Brasserie was designed to offer a bright, modern, and stylish dining space. The Sally Gap Bar has been cleverly designed to maximise space and utilise the three new large bi-fold window sections to create an indoor-outdoor atmosphere & the floor area was almost doubled. The new limestone fireplace creates a focal point to the room and library walls furnish the space adding to the atmosphere. The space also contains theatre kitchen for those who like to see what's going on behind the scenes.

The Powerscourt Sally Gap Bar & Brasserie was exceptionally challenging due to the fast-track construction sequence extending over a period of 16 weeks. The work involved significant integration of Specialist equipment which necessitated complete strip out of existing fresh air supplies & extract systems from the Bar & Kitchen areas. Complete new energy efficient mechanical ventilation was installed including heat recovery. Likewise, Axiseng designed integrated Kitchen & Bar extract systems preventing the spaces from unwanted air pollutants & odours.

Key Features

- Extensive Mechanical design integration due to the fast-track nature of the project.
- Work in a live five-star Hotel where guest comfort could not be compromised.
- Uncompromising programme incorporating both Design & Construction, including Specialist Suppliers.
